# API And Embed Upload

Physician · https://mymedicalimages.com/help/api-and-embed-upload/

### API And Embed Upload

mymedicalimages supplies both an API key, as well as an Embedded Upload for you to utilize with your website. Both of these features can be located in the "Account and Settings" drop-down menu under the "Patient Uploaders" section.

### API Key

The API key to interface with mymedicalimages.com can be located under the tab labeled "API Key". This will be the first tab that opens when you select the "Patient Uploaders" option.
In this tab, you can copy your API key in order to implement it with the code for your website, or generate a new key by clicking the blue "Re-generate API Key" button.
