Physician Features

Case Folders

As a Physician account, you will have access to our Case Folder tool, which will allow you to organize studies you receive into folders that you create.

Requested Images

This feature allows you to request studies from patients, giving them an upload link that will drop the study directly into your account.

Consults

This feature allows you to search our database for a consultation from a fellow Physician.

Create Study

This feature allows you to create a study from scratch, letting you write your own notes and request the required images and reports to be link directly to the study.

Exam Rooms

This feature allows you to access mymedicalimages Telemedicine feature, letting you invite someone to a one-on-one video conference through email or mobile phone.
