Sending a Request For Images

Log into your mymedicalimages account and click the Request Images button in the upper right corner.

Enter the Information of the person you would like to request images from and click send. The recipient will receive an email with your request link allowing them to create a free account to upload their images directly to you.

The recipient will be able to upload images from a CD, ZIP file, Local Folder, or from within their mymedicalimages account.

You can see your Request History and the status of your requests by clicking Requested Images from the main dropdown menu, and opening the Request History tab.
