Requesting Images

Step 1: Log-in to your mymedicalimages account at https://app.mymedicalimages.com/.

Step 2: Click on the purple menu icon in the top left-hand corner of the screen, then select the "Requested Images" option.

Step 3: Fill out the request form with the relevant information for the person you are trying to request images from and include a brief description of the images in question in the text field provided. You can also include a phone number for them to contact you with.

Step 4: Once all of the information is put down, click on the blue "Send" button. After this has been done, you will be taken to your "Request History" page. The request has now been successfully submitted, and the status for it will be marked as "pending" until the images have been sent to your account, after which it will be marked as "Received" and will be accessible with the blue "View" button.
