Sharing Your Images

Step 1: Log-in to your mymedicalimages account at https://app.mymedicalimages.com/.

Step 2: For the images you would like to share, click on the "menu icon" in the top right-hand corner of the image and select the "Share" option.

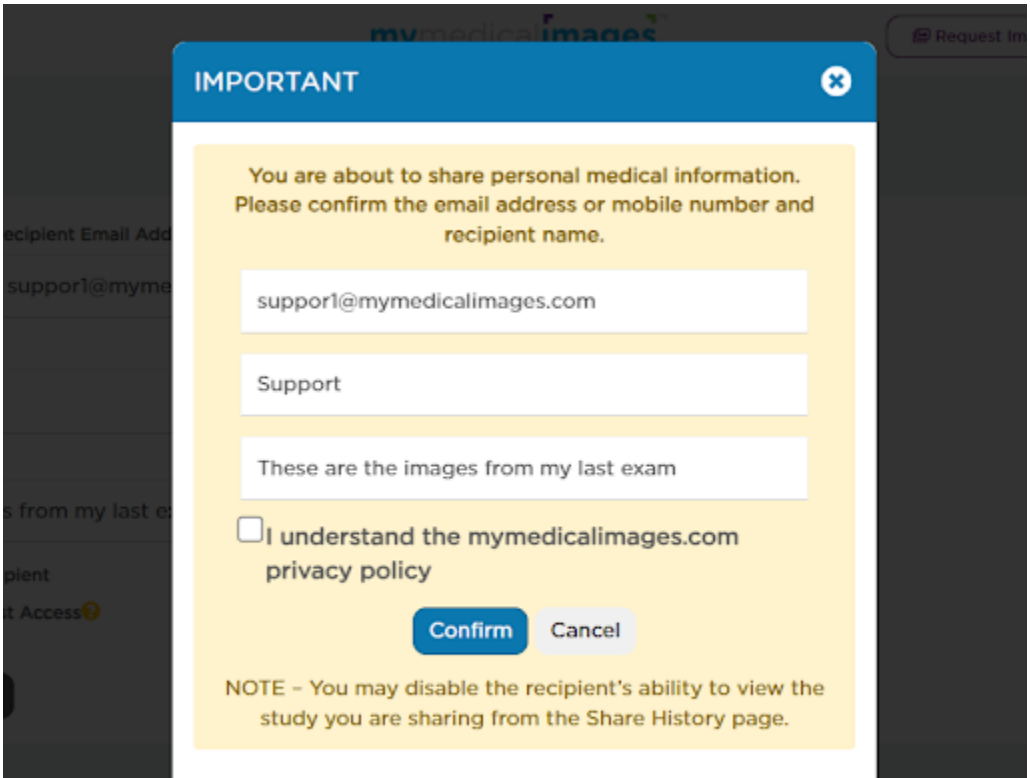

Step 3: Select whether you would like to send the share to the person’s email address or Phone Number, then enter in their information in the text field to the right.

Step 4: Fill in the text fields with the relevant information. In the case of the Note to Recipient field, it's recommended you leave a brief description detailing the contents of the share.

Step 5: Check off whether or not you would like the user to be logged into their mymedicalimages account before they can view your images, and whether or not you want to include all of the attachments associated with the images you are sharing. Once you made your choices, Click on the blue "Share" button.

Step 6: Click the checkbox stating that you understand the mymedicalimages privacy policy and then click on the blue "Confirm" button.

Step 7: After you have clicked confirm, you will be redirected to your Share History page, where you will be able to review previous shares you have made. Your Share has been sent out and the recipient can check their email or text messages to view the images you have shared with them.
