Physician Profile

The Physician Profile allows you to edit settings, opt in or out of patient facing features, and update information about yourself and your practice. The information you include is shown to patients searching for doctors for second opinions.

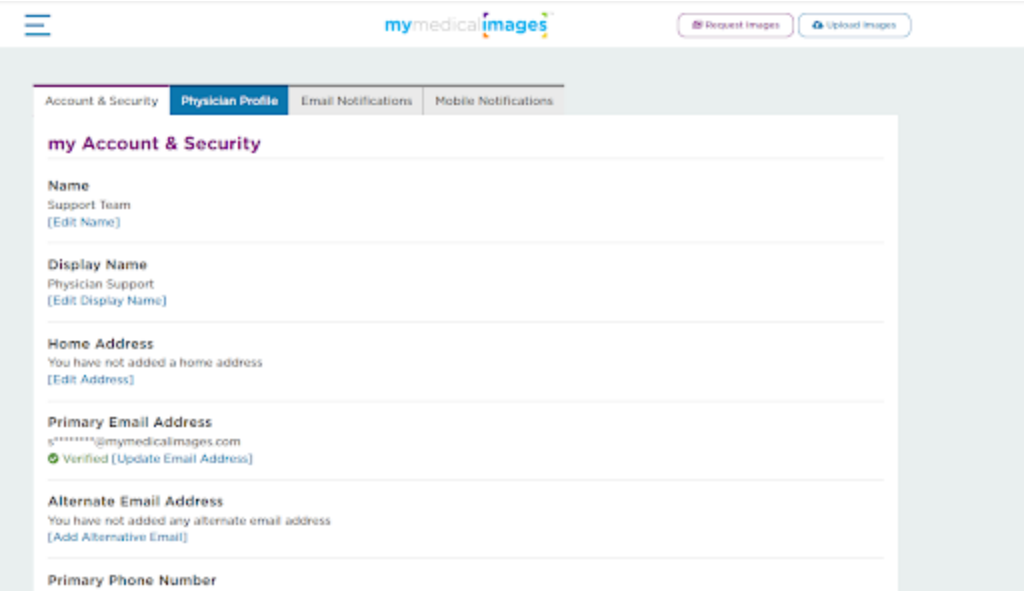

Sign into your mymedicalimages account and click the main menu dropdown.

Click on Account and Settings, then Account Info.

Click on the Physician Profile Tab.

In the Physician Profile, you can add information such as your specialty, hospital affiliations, and accepted insurance.
