Viewing Image Information

With any given image set, you can either view the simplified information for the set, or the detailed information.

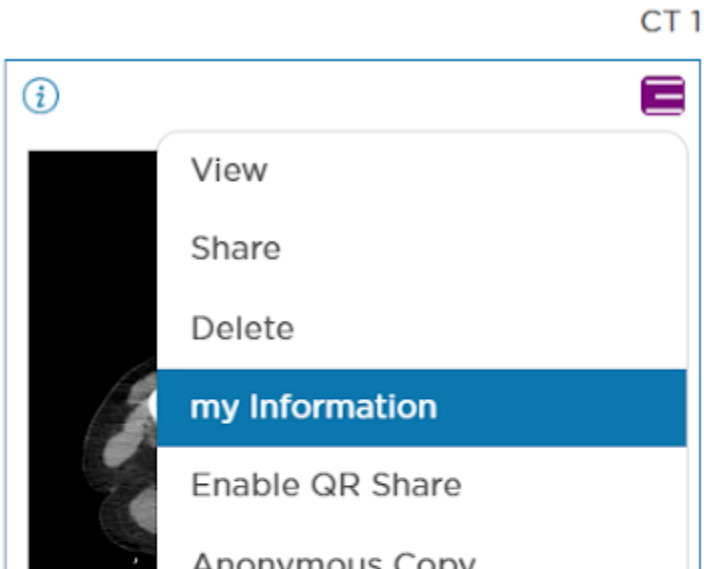

on the blue "i" icon in the top left-hand

The information for the image set will be displayed as an overlay covering the preview of the set. You can dismiss this overlay by clicking on the blue "i" button a second time.

In order to see more detailed information of the images contained within a set, click on the blue menu icon in the top right-hand corner of the image set and select the "my Information" option in the dropdown menu.

Selecting this option will direct you to the images information page, which will detail all of the associated patient information, as well as details about each image contained within the set.
