

BELOW ARE A FEW TIPS TO GET STARTED

First, create your **FREE** account by clicking [here](#).

IMPORTANT - For security purposes, **new account email addresses must be verified** to enable all features.

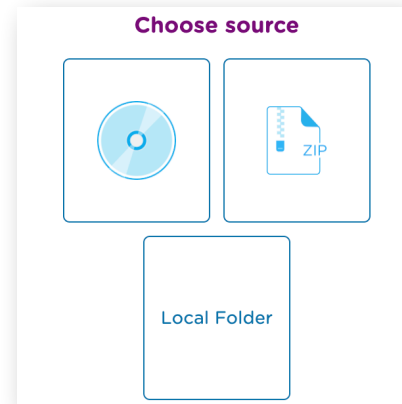

Note: if using an .edu email, please check your spam folder initially.

Tip 1

TO UPLOAD IMAGES you will need to have access to the athlete's images, whether on a CD, zip file, or a thumb drive. Note: if on a CD, you'll need a CD drive connected to your computer.

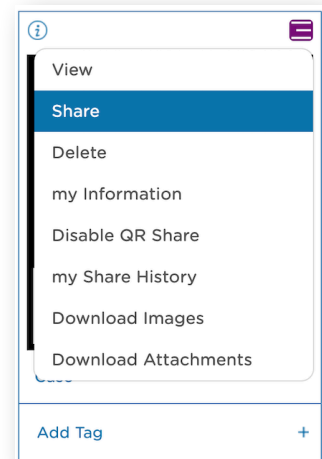

Learn [more](#)

Tip 2

TO SHARE IMAGES with Physicians or Family, select "Share" from the menu located at the top right corner of an image. Images can be shared with physicians or family members - with or without a mymedicalimages account.

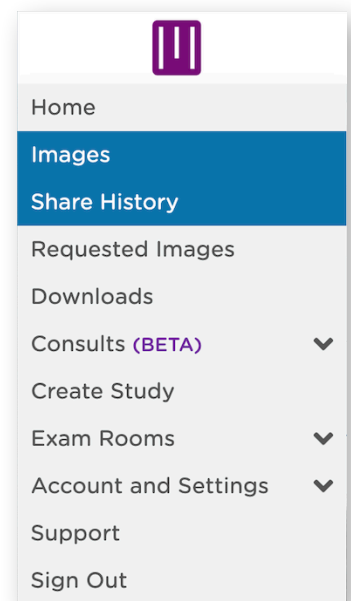

Note: recipients without a mymedicalimages account will have view-only access.

Have your images been viewed yet?

To check the "View Status" (pending or viewed), click on the "Share History", and choose tab "I Shared".

Tip 3

TO REQUEST IMAGES select “Requested Images” from the drop-down menu located at the top left corner of your dashboard (home screen). Learn [more](#)

Input the athlete’s email and name. Athletes will be able to upload images at no cost and will receive a Free Basic Account.

Once images have been received, an email notification will be sent from mymedicalimages. The status of requested images can be found on the “Request History” table.

Note: Use the Search Bar to find images from anywhere in your account. Type in the athlete’s name.

Tip 4

IF YOUR FACILITY HAS X-RAY or other medical imaging (DICOM) equipment you may be able to enable staff to view images immediately, without leaving the field of play.

For more information, to schedule a brief demo, or to set up our DICOM send feature - please contact us at:
